

About the HASSLACHER Green Tower GmbH

HASSLACHER Green Tower GmbH develops and manufactures innovative timber hybrid towers for wind turbines. The company has offices in Sachsenburg (Austria) and Hamburg (Germany). As a wholly-owned subsidiary of the internationally active HASSLACHER Group, HASSLACHER Green Tower combines decades of experience in structural timber construction with modern wind energy technology and a consistent focus on sustainability.

HASSLACHER Green Tower produces towers that combine a timber truss with tubular steel sections to form an intelligent hybrid structure. The modular truss structure can be flexibly scaled to hub heights of 200 metres and above. Four individual foundations complement the system, reducing the amount of concrete required and minimising disruption to the ground.

A high degree of prefabrication facilitates transport and enables rapid and cost-effective assembly on site. As a renewable and recyclable raw material, timber also contributes significantly to reducing the ecological footprint. Once they have served their purpose as wind turbine towers, the timber components can be reused in conventional building construction.

About the HASSLACHER Group

The HASSLACHER Group is a globally active innovation leader in the field of intelligent and integrated system solutions for modern timber construction. The family-run enterprise has had its roots for generations in the use of wood as a wonderfully renewable raw material and for more than 120 years has stood for a pioneering spirit, performance, quality, sustainability and social responsibility.

Together with our 2,000 employees, we at the HASSLACHER Group produce innovative products in the areas of sawn timber, surfaced timber, glued laminated timber, cross laminated timber and structural finger jointed solid timber for the European and international market. True to the motto:

“From **wood** to **wonders**.”
